Subject: Microsoft case opinion

I just wanted to make my opinion heard regarding the Microsoft case. I think that Microsoft has intentionally been involved in monopolistic practices for may years, and that it has severely hurt the computer industry and stifled the US technology economy as a result. I also think that they are getting off far too easy, as they have done so in the past.

I implore you to please stop this monopoly now while there is still a chance. You can make a difference today while there is still barely enough of the technology industry left to produce far more advanced technology and bring back hundreds of thousands of jobs back to the US.

Thank you,
Bob Lopez
